Detailed Action

1. This communication is response to the amendment filed on 5/5/06.

Claims 1-22 and 24-31 are pending in this Office Action

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, 15-16, and 24-31 are drawn from the electronic data relates to online activity, classified in class 725, subclass 51.
 - II. Claims 7-14 and 17-20 are drawn from comparing data with one or more threshold values, classified in class 707, subclass 6.

The inventions are distinct, each from the other because of the following reasons:

Inventions in Groups I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention in Group I has separate utility such as the electronic data relates to online activity. See MPEP § 806.05(d). Invention in Group II has separate utility and requires comparing data with one or more threshold values.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.

The response time for this Office Action is **one month (30 days)**.

Applicants are advised that the reply to this requirement to be complete must include and election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
